No other services will be affected

On January 23, Clean Harbors announced that the company is acquiring Veolia North America's US Industrial Cleaning Services Division. It is anticipated that the acquisition will close some time in the first quarter of 2018.

All other services and activities will not be impacted, including those provided by Veolia's Environmental Solutions & Services business in Canada and the US, Industrial Water & Regeneration Services, Municipal & Commercial businesses. The services that Veolia provides you and your business will continue as usual.

EPA Working to Launch New Electronic Manifest System for Hazardous Waste

e-Manifest to launch in June 2018

The EPA is establishing a national system for tracking hazardous waste shipments electronically. This system, known as "e-Manifest," will modernize the nation's cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for the industry and state agencies.

Benefits of the e-Manifest system include:

- A reduction of paperwork that is eventually expected to save industry and states approximately $75 million annually
- Creation of a unified, single hub for one stop collection of manifest data and related reporting for use by EPA and all state agencies
- Improved accuracy and timely communication of information on waste shipments
- Rapid notification of discrepancies or other problems related to a particular shipment
- Increased effectiveness of compliance monitoring of waste shipments by regulators

Please click below to learn more about EPA's recent final rule to establish the e-Manifest system and Veolia's approach to implementation.
